

# Product Brief | Rimage Professional™ 5410N

## A powerful in-house solution delivering quality results

The Rimage Professional 5410N is a high-performance, front-office solution for automatically creating CDs, DVDs and Blu-ray Discs™ with customized digital content and direct-to-disc printing. Your business will benefit from a fully automated and intelligent in-house digital publishing solution with a low long-term cost of ownership.

## Benefits

### Integrated embedded computer

The 5410N has a full-featured Windows 7 computer with an Intel® Core™ i3 processor and 4GB of RAM enabling networking, running local applications and maximizing throughput.

### Small footprint

The 5410N system is designed to tuck into tight spaces. With an embedded PC and fewer cables/connections, the 5410N provides increased data throughput, faster disc production and a reduced overall footprint, when compared to a Rimage 3410.

### Network connectivity

With an Ethernet connection, the networked 5410N system is as simple to use as a printer or copier.

### Integrated printer

Rimage's Everest™ 400 printer is the market's only fully integrated 400 dpi printer, providing indelible, high-resolution images and sharp, easy-to-read text.

### Unmatched performance

The three-bin carousel with optional 50-disc output bin enables three media types to run concurrently. Publish up to 18 full DVD-Rs (4.7 GB) and 30 full CD-Rs (700 MB) per hour with hands-free operation.

## Features

Backed by Rimage's decades of experience in designing and building hardware, the Rimage 5410N standard features include:

- Embedded Windows 7 computer
- Integrated DiscWatch status light
- Front and rear USB ports
- Two quick-release recorders
- LCD status display
- Rotating three-bin 150-disc carousel for input/output
- External five-disc output bin
- Integrated Everest 400 thermal retransfer printer
- Internal lighting

Professional 5410N  
shown with optional  
50-disc external output bin

## Options

- Blu-ray recorders
- DiscFlow™ for Mac
- 50-disc external output bin
- Media reader
- Windows Server 2008 R2 Standard
